

ChargePoint Flex Plus for businesses and fleets

Complete, cost-effective AC charging

ChargePoint® Flex Plus for businesses and fleets helps you reduce costs, simplify operations, and provide a reliable driver experience.

Control costs with intelligent energy management

Cloud-based features - like Power Sharing Groups - reduce deployment and operating expenses from day one. Scale with a dynamic load management hardware bundle or remain future-ready with the integrated MODBUS capability to integrate into any compatible building or energy management system*.

Simplify installation and scalability

Our modular backplate design makes setup faster and allows for tool-free charger swaps, ensuring your network grows confidently with demand.

Gain native connected visibility

Centrally manage access, billing, and remote diagnostics through the ChargePoint platform for full oversight of your charging operations.

Get charging insights with a customizable dashboard and reports that help you understand station usage, utility costs, stations health, environmental impact and more.

Avoid costly site upgrades and save on day-to-day fueling costs with advanced energy management features."

Ideal for

Fleets

Multi-family Properties

Workplaces and Small Businesses

Property Owners and Semi-Public Sites

Assigned Parking

Many more sites

*MODBUS capability will be made available at a later stage with a firmware update.

Benefits of ChargePoint Flex Plus for businesses and fleets

Instant start using RFID (ISO 15693/14443) or NFC Tap to Charge on Apple and Android

Flexible installation options for wall or pedestal mounting with socket or integrated cable

Full compliance with MID, CE, E.V. READY, UK smart charging regulation, Austrian R37 TOR regulation, and Eichrecht metrology standards

High-visibility LED indicators for checking charging status at a glance from a distance

Continuous connectivity via 4G LTE, Wi-Fi, Bluetooth 5.0, and Ethernet RJ45 options

Future-ready hardware with ISO 15118-ready and OCPP 2.0.1 compatibility for smart charging

Tool-free mounting independent backplate design for rapid installation and simplified ongoing maintenance

Ruggedized IP56 weatherproof and IK10 impact protection for durability in any environment

Technical Specifications

Feature	Description
Electrical output	Up to 7.4 kW (230V) for 1-phase Up to 11 kW (400V/230V) for 3-phase
Mounting	Pedestal, wall
Connector type options	IEC 62196-2 Type 2 socket IEC 62196-2 Type 2 socket with shutter IEC 62196-2 Type 2 integrated cable
Number of ports	Single
Cable length	5.5 m and 7 m
Operating temperature	-25°C to 50°C

About ChargePoint

ChargePoint is a leading provider of electric vehicle (EV) charging solutions, powering the shift to electric mobility across North America and Europe. Since 2007, we've built one of the largest and most open EV charging networks, giving drivers and businesses reliable access wherever they need it.

We serve a wide range of customers, including commercial businesses, fleet operators, and residential drivers, with a full-stack portfolio of AC and DC charging hardware, intelligent software, and comprehensive services. Our platform enables seamless charging experiences, efficient energy management, and scalable infrastructure tailored to each customer's needs.

ChargePoint is trusted by many of the world's top companies, major auto makers, and drivers. Our solutions help businesses attract and retain customers, reduce emissions, and future-proof their operations.

For channel partners, ChargePoint offers a robust ecosystem of products, tools, and support to help grow their business, deliver value to customers, and accelerate the adoption of electric mobility in their markets.

With deep industry expertise and a commitment to innovation, ChargePoint is accelerating the transition to electric mobility, supporting the infrastructure of today while building for the future.

Let's get started

We're always here to help you identify your charging goals, advise on the best approach and help evaluate your site.
