

CP6000 Site Commissioning Form

Complete the steps listed here for each ChargePoint charging station to ensure it is commissioned as specified. The detailed datasheets, site design guides, and installation guides defining ChargePoint specifications and procedures are available online at: chargepoint.com/eu/guides.

Before Beginning Work

ChargePoint charging stations must be installed and serviced by qualified personnel only, equipped with appropriate personal protective equipment and following proper electrical and work practices.

DANGER: RISK OF SHOCK. Before performing any procedure, the technician must disconnect the power to the charging station at the service panel. Follow local code to de-energize the applicable circuit and lock out/tag out the disconnect before proceeding. Use a multimeter to test that power is off. Keep power off for the circuit until all cover panels are correctly reinstalled and the work is complete. FAILURE TO FOLLOW THESE INSTRUCTIONS CAN RESULT IN SERIOUS INJURY, LOSS OF LIFE, OR PROPERTY DAMAGE.

Note: Commissioning inspection protocols, measurements, and photo documentation must be completed at the same time as station installation and via the ChargePoint Service Pro app once it is available.

Before removing any station parts:

- Consult with site personnel for access to site and equipment.
- Verify de-energization and lock out / tag out of all power sources to the station as stated in the shock danger warning above.
- Wear appropriate Personal Protective Equipment (PPE) and verify the station is de-energized.

CAUTION: For all sections below, items marked with C are critical to prevent hazard or equipment damage.

- If a critical (C) item does not pass, complete the entire inspection but DO NOT energize the site. Contact ChargePoint for the next steps. If a critical (C) item does pass, complete the entire inspection and energize the site according to site authorization.
- All checks must be completed. Items marked with are optional and might not fail commissioning if
 they are not applicable or separate action can be taken. If an optional (○) item is incomplete,
 describe the reason.
- Items marked with 🛶 require a photo and 🗏 require a document.
 - All photos should be sharp and focused on the item being documented.
 - All photos should be .jpg format. Apple's standard HEIC format is NOT acceptable.
 - The aspect ratio should be 16:9 or 4:3 and resolution should be between 5.0 12.1 MP.

After Work

- For ChargePoint managed installations, the Commissioning Form and related attachments, such as photos and documents can be submitted via the Work Order associated with the specific installation.
- The Installer must always keep a copy of the Site Commissioning Form and related attachments, such as photos and documents, to be submitted to ChargePoint on request.

Site Inspection

General Information

Station Installation Performed by				
Technician name				
Technician phone				
Technician email				
Commissioning start date (dd/mm/yyyy)				
Commissioning end date (dd/mm/yyyy)				

Readiness

1.	0	Was site preparation (Make Ready) performed by the installer or a third-party contractor?	ChargePoint recommended installer Customer hired contractor
2.	یمنا	Are LTE repeaters available on site?	Yes No
	0	Number of repeaters	
		If Yes, Make and model (upload photo)	
3.		Are the concrete pad's edges smooth?	N/A Yes No
		Only for pedestal mounted installations	.,
4.		Is the slope of the pad less than 2%, or 6 mm per 300 mm or 1/2 in per 25 in?	N/A Yes No
		Only for pedestal mounted installations	
5.		Does the installation comply with local disability regulations?	Yes No
6.		Are the site conditions conforming to the nominal pad? (i.e., 600 x 600 x 600 mm)?	N/A Yes No
		Only for pedestal mounted installations	
7.		Is the parking area clean and free of all crate fasteners, packaging, and debris?	Yes No No
8.		Site readiness comments (if any)	

Balance of Plant

9.		Is solar available on site	?	N/A Yes No
	0	If information available (kWp)	, solar installed power	
10.	С	Grid type (earthing syst Note: TN-C and IT grid / not supported	-	TN-C
11.	С	Is the breaker feeding ea voltmeter test at the sconfirm that it powers o		Yes No
12.		Master Circuit Breaker (MCB) specifications	Make Rating (A)	
13.		Charger Circuit Breaker specifications	Make Rating (A)	
	С	meet these ratings? Nominal voltage Maximum AC current	a dedicated breaker and 400 V 63 A	Yes No
14.		Maximum breaker size 63 A Does each station breaker's ID card have the correct label?		Yes No No
15.		Is additional surge protection installed at the service panel? Only if the site requires it, such as frequent thunderstorms		Yes No
16.		Is a Residual Current Device (RCD, RCCB, RCBO) required per local code?		Yes No
		If Yes, provide specifications	Make and model Rating (A)	
	:	(upload device photo with specifications) (Cha	AC leakage current (mA) rgePoint prefers 100 mA)	
		Curv	Delay (ms) e type (i.e., A, A-EV, or B) ePoint prefers B or A-EV)	
17.		If accessible, take a photo of the electrical panel specification label showing total capacity.		Yes No

18.	:	If accessible, take a place dead front off, show	photo of the electrical panel - ing terminations.	Yes No
19.	:	If accessible, take a photo of the electrical panel - dead front on, showing breaker ratings.		Yes No
20.	٠	Are distribution pan show the correct lab	el exteriors undamaged and pels?	Yes No No
21.		Is the switchboard correctly wired for multiple charging stations and are all breakers labelled correctly?		N/A Yes No
22.	0	Upload Single Line E installation	Diagram (SLD) of the	N/A Yes No
23.		Are the electrical enclosures clean and free of wire strands and metal shavings?		Yes No No
24.		AC conductor Photo must show the conductor ratings	Material	Copper (Cu)
		specified here or	Cross section	
	or	attach the cable rating	Voltage rating (if accessible)	
		specification document if markings are not clear	Temperature rating (if accessible)	
			Insulation type (if accessible)	
25.	С	Are wire sizes at the 25 mm ² ?	station not exceeding	Yes No No
26.		Balance of plant con	nments (if any)	
		1		I .

Station Inspection

General Information

27.	ia	Station Serial Number
	(P)	It can be found on the back of the Head Unit
28.		Station MAC Address
		It can be found on the label applied on the screen's
		protective film

Mounting and AC Supply

29.		How many AC supply cables are connected to the station?	One (Circuit Sharing) Two
30.	С	Is the pedestal plumb? Only for pedestal mounted installations	N/A Yes No
31.	С	Is the station level? Only for wall mounted installations	N/A Yes No
32.	0	Are the Eichrecht sealing and markings intact and correct per local codes and the CP6000 Installation Guide?	N/A Yes No
		Only for stations in Germany and Austria that are public	

Internal Inspection

33.	C	Are all input AC wires stripped to the correct length of 12 mm (1/2 in)?	Yes No
34.	C	Upload a photo of the conductors and ground wires fully inserted and connected properly	Yes No
35.	С	Is a Power Management Kit (PMK) installed for dual port cables supplied with a single AC cable? For Single Phase installation, only L1-L1 PMK can be used	L1 - L2 L1 - L1 N/A
36.		Phase Rotation AC Supply #1	L1 L2 L3 (RST) L2 L3 L1 (STR) L3 L1 L2 (TRS)
37.		Phase Rotation AC Supply #2 Only for two cable inputs	L1 L2 L3 (RST)
Only f	or mo	dels equipped with charging cables	
38.	С	Are the charging cables undamaged?	N/A Yes No
39.		Does the charging cable retraction mechanism operate smoothly (i.e., fully extends and retracts)?	N/A Yes No

40.		Upload photo of head unit assembly including top cap, holsters, and charging cables resting in their holsters (if applicable)	Yes No
41.	C	Upload a photo of the applied rating labels	Yes No

Post Energization Checks

Electri	cal M	easurements	
42.		Upload the following documents or fill the rows below: • The mandatory local inspection document (i.e., VDE, BS, etc.) • A dedicated testing & measurement	Yes No
		protocol	
43.	С	Is the line-to-line voltage (i.e., between L1-L2, L2-L3, L3-L1) at the AC disconnect (if present) or breaker 400 VAC +/- 10%?	N/A Yes No
		Voltage (V)	
44.	С	Is the line-to-neutral voltage (i.e., between L1-N, L2-N, L3-N) at the AC disconnect (if present) or breaker 230 VAC +/- 10%?	N/A Yes No
		Voltage (V)	
45.	С	Is the N to PE (ground) voltage measurement <5 V?	N/A Yes No
		Voltage (V)	
46.		Measure the following if no measurement protocol is available:	N/A
		Supply Cable Insulation Resistance (Riso): Lowest value (MOhms)	
		Prospective Earth Fault Current (PEFC) L1-PE, L2-PE-L3-PE for each phase (A) Prospective Short Circuit Current (PSC) L1-N, L2-N-	
		L3-N for each phase (A)	
		Are the results per the calculation?	Yes No
		RCD trigger current (mA)	
		RCD trigger time (ms) RCD touching voltage (V)	
		Phase rotation	Left
		Pridse rotation	Right

47.	С	Does the station power on and no error message is displayed on the touchscreen?		Yes	No 🗌
48.	С	Are the LED bars for each port functioning correctly?		Yes	No 🗌
49.		Veirfy that the Installation Wizard is complete and that the station is pinpointed		Yes	No
50.	С	Is phase rotation executed and configured during pinpointing?	N/A	Yes	No
		Only for multiple station installations			
51.	С	Contact ChargePoint Support (<u>chargepoint.com/support</u>) to complete station activation and update station software		Yes	No 🗌
Statio	n Test	SS			
52.		Type and model of testing and measuring device used			
		Status A			
		Status B			
		Status C			
		Status E			
		Status F			
53.	С	Is the ground impedance (PE) measured around the AC terminal <100 Ohms (Ω)?	N/A	Yes	No
		Ohms (Ω)			
54.	С	Is the RFID reader functioning and responding when tapped with a ChargePoint card or ChargePoint app?		Yes	No
55.	С	Test charging sessions completed on both ports or cables		Yes	No
56.	С	Is the dBm value displayed on the touchscreen? Only for stations with touchscreen	N/A	Yes	No
		dBm			
57.	0	Station test comments (if any)			

Cellular Coverage Evaluation

58.	С	Is the station connected to the ChargePo network and can a charging session be authorized via ChargePoint dashboard?	vint Yes No
59.	0	Cellular evaluation comments (if any)	
l,			, hereby confirm the following:
•		tructions in the Installation Guide have bed	
•	Torqu	ed all fasteners to the correct torque value	es using an appropriate tool
	but is	•	es, norms, standards, and regulations. This includes is, electrical regulations, building regulations, of the local authorities.
		y that the scope of work has been comple cal, or safety issues	ted correctly and that the station has no functional,
Name	and si	gnature of the technician who commissior	ned the stations.
