

Site Commissioning Form

You can send the completed form and the required images to ChargePoint activation e-mail.

This form is used by the certified commissioning partner or commissioning team to ensure that the hardware components (router and external power supply) of the network control package are correctly installed and online. The validation includes checking the elements from the checklist.

General Information

Customer Information	
Customer name	
Customer contact name	
Customer contact phone	
Customer contact email	

Street and number	
City	
State	
Country	
Post code
