ChargePoint CMS Suite Enterprise Fleet Cloud Plan

Datasheet

2026

Features and Ordering Information

The ChargePoint® CMS Suite Fleet Enterprise supports fleet operations and optimization tools for complete fleet charging management. Build on enterprise capabilities with telematics integration, charge optimization, battery preconditioning, and dispatch integration.

Enterprise Fleet Cloud Plan Features

Category	Feature*	Description
Station Management	Station software updates	Stay updated with new features and performance enhancements delivered over-the-air. *Applicable only to ChargePoint Hardware
	Real-time station status	View real-time station status, driver details, power usage, energy costs, and driver revenue.
	Dashboard insights	Access and customize charts and reports on station usage, utility costs, environmental impact, and more.
	User management & administrative controls	Manage roles and permissions for ChargePoint CMS Platform users across multiple sites.
	Valet dashboard	Dedicated dashboard that notifies valet staff when cars are done charging so they can be moved.
	Sites and custom groups	Create custom station groups to simplify configuration and reporting across large install bases.
	Session limits	Set limits to energy dispensed, time, or state of charge per session
	On-station video uploads	Upload branded videos for automatic playback on supported stations.
	Station messages	Display station screen messages for drivers.
Access Control	Set access hours	Control access hours and restrictions on public access.
	RFID-based access control	Link RFID access cards to specific vehicles in your organization.
	Driver access control	Customize access to stations; control which group of drivers can access stations.
Financial Administration	Pricing and tax configuration	Set pricing by energy, duration, time of use, or session for the drivers.
	Differentiated pricing	Set differentiated pricing for different registered driver groups.
Driver Administration	Connections	Allow drivers to register for differentiated pricing and charging benefits via Connections.
	Waitlist	Allow drivers to join a waitlist for ChargePoint stations through the ChargePoint Driver App.
	Advanced Waitlist	Allow admins to prioritize/remove drivers, view org-wide advanced analytics, and configure advanced waitlist schedules.
	Driver session limit	Set a maximum number of sessions that a driver can initiate in a recurring period.

Category	Feature*	Description
Energy Management	Multi-level power sharing	Configure power sharing across circuits, panels, and sites with enforced load limits.
	Fixed power derating	Set a permanent maximum power limit. *Available for AC stations only.
	Hierarchical power sharing	Configure power-sharing limits for parent and child station groups and keep charging load within each limit.
	Reporting on meter data and advanced analytics	Advanced reporting on meter and other charging data in 15-minute increments.
	Time of use power sharing	Define charging start times and adjust power levels according to the time of day.
	Dynamic load management	Automatically manage charging power based on real-time site load and available capacity.
ChargePoint mobile application for drivers	Make stations publicly available	Publish stations to the ChargePoint web portal and ChargePoint Driver app for driver discovery, use, and payment.
	Tap to charge	Allow drivers to initiate and pay for charging by tapping their iOS or Android mobile wallets. *This feature is not available on CPF50 stations.
	Notify when available	Enable drivers to receive text, email, or mobile app notifications when a selected station becomes available for them to use.
	EV charging network roaming	Allow drivers to use your charging stations with supported third-party network apps.
Fleet Operations	Vehicle management	Control access and billing at the vehicle level with centralized payment for en-route charging and manage access to owned stations.
	Telematics integration	Import live and historical vehicle data to prioritize power distribution and control charging behavior.
	Charge optimization: CMS	Optimize charging across connected vehicles using first in, first out, equal charge, or round robin policies within a site power cap.
	Charge optimization: Fleet Ops	Optimize fleet charging schedules using state of charge, departure times, utility costs, and fleet management preferences.
	Role-specific alerts	Send alerts only to designated user roles based on the event type.
	Fixed-schedule pre-conditioning	Warms/cools the vehicle and preconditions it for operations while charging.
	Integrations with dispatch and scheduling systems	Integrate with dispatch and scheduling systems to trigger pre-conditioning and coordinate charging schedules.
	Vehicle to block	Assign vehicles to predefined charging schedules that control

Category	Feature*	Description
	assignments	when they can be charged.
	Dynamically scheduled pre-conditioning	Pre-condition vehicles dynamically based on configurable schedule and operating parameters while connected to the charger.

Enterprise Fleet Cloud Plan Features

One ChargePoint cloud plan is required per port to activate a charging station on the ChargePoint network.

Description	Order Code
CMS Suite Enterprise Fleet Cloud Plan for Level 2 AC	CP-SW-STE-ENTERPRISE-FLT-AC-1P
CMS Suite Enterprise Fleet Cloud Plan for Level 3 DC	CP-SW-STE-ENTERPRISE-FLT-DC-1P
